MINDFULNESS

There are free Mindfulness Apps available to download on to your smartphone or download on to a computer or tablet. These free Apps can be found by searching the following:

- **Headspace** www.meditofoundation.org
- **Calm** www.freemindfulness.org
- **Mindfulness exercises.com**

Steps Toward Mindfulness

1. Start with 5 minutes a day and work your way up from there at a pace that feels comfortable to you. Schedule time to do Mindfulness. I prefer to do it in the morning when I get up, but for others, it may work better later in the day. Remember, if you don't schedule time for it won't happen.
2. Now that you have a good understanding of Parkinson's Disease, the symptoms and the importance of exercise, I want you to work on making a daily schedule for the next 30-60 days that includes exercise, mindfulness and sleep.
3. Ensure that you continue completing daily journal entries and that you are answering the specific questions on a daily basis. It's important that you start feeling more positive about your situation and develop more confidence in being able to face the challenges, now, and in the future.
